SKILLS

Frontend

JavaScript	HTML
React JS	CSS
Vue JS	EJS
Bootstrap	jQuery
Tailwind	Nuxt JS

Backend

RESTful API	PHP (Laravel)
Express JS	NodeJS

Databases

MongoDB
PostgreSQL

Tools

GitHub	Jira
Docker	Figma
Postman	GitHub Copilot
Insomnia	MS Office

Concepts

OOP	PWA
Pixel-perfect	SDLC
Responsive Design	Scrum
CI/CD basics	Microservices
Unit Testing	

Soft Skills

Teamwork
Problem-solving
Adaptability
Fast Learner
Self-management

LANGUAGES

English (B2)
German (B2)
Ukrainian (Native)
Russian (Native)

ACHIEVEMENTS

1st Place at IV Hackathon
YEPS "Innovative IT Solutions
to Combat Fraud"

Collaborated on 8 projects
successfully launched to
production

PROFILE

Junior Fullstack Developer with a passion for building modern technologies and innovative web applications. In my previous roles, I have learned to tackle complex challenges with structure, find creative solutions, and optimize processes efficiently. Combined with my teamwork, attention to detail, and clear communication, these experiences allow me to not only solve technical problems but also deliver real value to projects and teams.

WORK EXPERIENCE

Junior Fullstack Developer

November 2023 – January 2026

Freelance Projects (Vinnysia IT-Akademie Mentored)

- Developed full-stack web applications and admin panels for real client projects.
- Implemented backend logic, APIs, and databases (PHP/Laravel, Node.js/Express, PostgreSQL, MongoDB).
- Built dynamic frontends with Vue.js, EJS, HTML, CSS, JS and ensured reliable form validation.

Logistics Manager

February 2017 – February 2022

Zapravsky GmbH

- Coordinated logistics operations and managed a team of 5 drivers, overseeing budgets and 35+ daily transportation orders.
- Optimized operational processes, reducing delivery delays by 20% and improving overall team performance by 13%.

Secretary

August 2012 – January 2017

Mariupol School № 44

- Provided administrative support for a team of 25 employees, managing 200+ monthly documents, reports, and appointments.
- Improved office organization, internal communication, and coordination with parents and external partners, increasing operational efficiency and documentation quality.

EDUCATION AND TRAINING

Fullstack Developer

February 2023 - Present

Vinnysia IT-Akademie

Google Certificates

June 2025 - September 2025

Google IT Support

Meta Certificates

September 2024 - September 2025

Front-End Developer, Back-End, APIs
Databases, React, UX/UI, JS, HTML/CSS, Full-Stack Developer

German Language Course B2

January 2025 - June 2025

Volkshochschule Chemnitz

SheCodes Certificates

September 2024

Web, Responsive, React

Bachelor of Laws

October 2008 – October 2012

National University of Internal Affairs

PROJECTS

Portfolio Website

University INTITA **Project-URL**

November 2025 - January 2026

Official website of University showcasing academic programs, campus life, and admission pathways

- Developed responsive and dynamic frontend using Vue.js and Nuxt 3.
- Created interactive forms for student registration and inquiries.
- Enhanced accessibility across the project by implementing screen-reader-friendly markup, ARIA attributes, keyboard-navigable components, and improved semantic structure.
- Implemented modal components, including dynamic content modals (PDF, information blocks) with accessible markup.

Technologies:

Vue.js, Nuxt.js, Git

Lyceum INTITA **Project-URL**

October 2025 - November 2025

Official website of IT-Lyceum presenting educational programs, student life, and enrollment opportunities

- Developed responsive and dynamic frontend using Vue.js and Nuxt 3.
- Implemented multilingual support for Ukrainian and English.
- Created interactive forms for student registration and inquiries.
- Integrated media elements, including galleries, sliders, and Google Maps.

Technologies:

Vue.js, Nuxt.js, Git

Injobe

June 2025

A job-matching platform designed to connect employers with candidates efficiently, providing modern tools for recruitment and job search.

- Developing the admin panel for managing users, vacancies, and applications.
- Implemented backend logic with controllers, models, and API routes to support application workflows.
- Designing and implementing CRUD operations for job postings and candidate data.
- Ensured reliability through error handling and form validation.

Technologies:

PHP, Laravel, Vue.js, Javascript, HTML, CSS, PostgreSQL, Docker, Git

Live Memory **Project-URL**

January 2025 – March 2025

Memorial platform honoring fallen ukrainian soldiers

- Developed and configured database structures, including migrations and initial data setup.
- Implemented backend logic using controllers and models to manage application workflows.
- Set up and maintained API and web routing to ensure smooth data flow.
- Applied comprehensive error management and form validation to enhance reliability.

Technologies:

PHP, Laravel, Vue.js, Javascript, HTML, CSS, PostgreSQL, Docker, Git

KAVA VETERANA

May 2024 – December 2024

Social project supporting veterans

- Developed and maintained the administrative panel, handling server-side logic and management features.
- Managed database structure and migrations, performing CRUD operations for efficient data handling.
- Tested API endpoints to ensure seamless communication between frontend, backend, and admin interface.

Technologies:

EJS, Node.js, Express, MongoDB, Mongoose, Git, Docker, Swagger, Postman

Oksana Tatarina

February 2024 – April 2024

Project-URL

- Developed a pixel-perfect responsive landing page to showcase courses and school information.
- Implemented user-friendly navigation, interactive elements, and optimized layout for different devices.
- Converted Figma design mockups into accurate frontend implementation, ensuring visual consistency.

Technologies:

HTML, CSS, JavaScript, jQuery, Bootstrap, Trello, Swiper, GitHub,

German Tutor

November 2023 – December 2023

Project-URL

- Developed a pixel-perfect responsive landing page to present tutor services and contact information.
- Implemented interactive elements such as sliders and smooth navigation for enhanced user experience.
- Organized project tasks using Trello to streamline workflow and ensure timely completion.
- Focused on cross-browser compatibility and mobile-friendly design.

Technologies:

HTML, CSS, JavaScript, jQuery, Bootstrap, Trello, Swiper, GitHub,

Travel Agency

November 2023 – December 2023

Project-URL

- Built a visually precise and responsive landing page highlighting travel destinations and services.
- Implemented dynamic elements such as interactive sliders, smooth scroll-to-top button, and a multilingual interface.
- Coordinated development tasks with Trello to ensure organized workflow and timely delivery.
- Focused on accessibility, responsive design, and consistent performance across devices and browsers.

Technologies:

HTML, CSS, JavaScript, jQuery, Bootstrap, Trello, Swiper, GitHub,

IT Uspih

October 2023 – November 2023

Project-URL

- Developed a pixel-perfect responsive landing page to showcase the academy's courses and programs.
- Created interactive sections, including a video block and informative content blocks, to enhance user engagement.
- Converted Figma designs into a fully functional frontend while maintaining design accuracy.
- Ensured smooth navigation, cross-browser compatibility, and mobile-friendly layout.

Technologies:

HTML, CSS, JavaScript, jQuery, Bootstrap, Trello, Swiper, GitHub,

Dobrogo vechora light

September 2023 – October 2023

Project-URL

- Created a responsive and visually precise landing page to present the academy's programs and offerings.
- Designed and implemented interactive features, including video sections and content blocks, to engage users effectively.
- Translated Figma mockups into a fully functional frontend while maintaining pixel-perfect accuracy.
- Optimized navigation, ensured mobile responsiveness, and improved overall accessibility and user experience.

Technologies:

HTML, CSS, JavaScript, jQuery, Bootstrap, Trello, Swiper, GitHub,
